BAYLINER®

Classic Runabouts

Owner's Manual Supplement
Hull Identification Number

- The Hull Identification Number (HIN) is located on the starboard side of the transom.
- Record the HIN (and the engine serial numbers) in the space provided above.
- Refer to the HIN for any correspondence or orders.

Hazard Boxes & Symbols

The hazard boxes and symbols shown below are used throughout this Supplement to call attention to potentially dangerous situations which could lead to either personal injury or product damage. Read ALL warnings carefully and follow all safety instructions.

**DANGER!**
This box alerts you to immediate hazards which WILL cause severe personal injury or death if the warning is ignored.

**WARNING!**
This box alerts you to hazards or unsafe practices which COULD result in severe personal injury or death if the warning is ignored.

**CAUTION**
This box alerts you to hazards or unsafe practices which COULD result in minor personal injury or cause product or property damage if the warning is ignored.

**NOTICE**
This box calls attention to installation, operation or maintenance information, which is important to proper operation but is not hazard related.

[Images of various hazard symbols and icons are shown here, including: Fire Hazard, Explosion Hazard, No Open Flame, Electrical Hazard, Hot Hazard, Falling Hazard, Rotating Propeller Hazard, Run Bilge Blowers for 4 Minutes, CO Poisoning Hazard, Carbon Monoxide Hazard.]
Chapter 1: Welcome Aboard!

• This Owner’s Manual Supplement provides information about your boat that is not covered in the Sport Boat Owner’s Manual.
• Before using your boat, study this Owner’s Manual Supplement, the Cruiser & Yacht Owner’s Manual, and all engine and accessory literature carefully.
• Keep this Owner’s Manual Supplement and the Sport Boat Owner’s Manual on your boat in a secure, yet readily available place.

Dealer Service

• Your dealer is your key to service.
• Ask your dealer to explain all systems before taking delivery of your boat.
• Contact your dealer if you have any problems with your new boat.
• If your dealer cannot help, call our customer service hotline: 360-435-8957 or send us a FAX: 360-403-4235.
• Buy replacement parts from any authorized Bayliner dealer.

Warranty Information

• Bayliner offers a Limited Warranty on each new Bayliner purchased through an authorized Bayliner dealer.
• A copy of the Limited Warranty was included in your owner’s packet.
• If you did not receive a copy of the Limited Warranty, please contact your Bayliner dealer or call 360-435-8957 for a copy.

Boating Experience

CONTROL HAZARD!

A qualified operator must be in control of the boat at all times. Do NOT operate your boat while under the influence of alcohol or drugs.

If this is your first boat or if you are changing to a type of boat you are not familiar with, for your own comfort and safety, obtain handling and operating experience before assuming command of this boat.
Take one of the boating safety classes offered by the U.S. Power Squadrons or the U.S. Coast Guard Auxiliary.
For more course information, including dates and locations of upcoming classes, contact the organizations directly:
• U.S. Power Squadrons: 1-888-FOR-USPS (1-888-367-8777) or on the Internet at: http://www.usps.org
• In Canada, for the CPS courses call 1-888-CPS-BOAT.
• U.S. Coast Guard Auxiliary: 1-800-368-5647 or on the Internet at: http://www.cgaux.org
Outside the United States, your selling dealer, national sailing federation or local boat club can advise you of local sea schools or competent instructors.
Engine & Accessories Guidelines

**NOTICE**

When storing your boat please refer to your engine’s operation and maintenance manuals.

- Your boat’s engine and accessories were selected to provide optimum performance and service.
- Installing a different engine or other accessories may cause unwanted handling characteristics.
- Should you choose to install a different engine or to add accessories that will affect the boat’s running trim, have an experienced marine technician perform a safety inspection and handling test before operating your boat again.

**Certain modifications to your boat will result in cancellation of your warranty protection.**
- Always check with your dealer before making any modifications to your boat.

**Propeller**

**CAUTION**

**ENGINE DAMAGE HAZARD!**

The factory standard propeller may not be the best for your particular boat and load conditions. Refer to the engine manual for engine RPM ratings. The engine should reach, but not exceed its full rated RPM when full-throttle is applied.

Immediately contact your local Bayliner dealer if:
- The engine cannot reach its full rated RPM when full-throttle is applied, or;
- The engine exceeds its full rated RPM when full-throttle is applied.

- Keep the propeller in good repair and at the correct pitch for your particular situation.
- A slightly bent or nicked propeller will adversely affect the performance of your boat.

**Engine & Accessories Literature**

- The engine and accessories installed on your boat come with their own operation and maintenance manuals.
- Read these manuals before using the engine and accessories.
- Unless noted otherwise, all engine and accessory literature referred to in this Supplement is included in your owner’s packet.
Qualified Maintenance

⚠️ WARNING!

To maintain the integrity and safety of your boat, allow only qualified personnel to perform maintenance on, or in any way modify the:

- Steering System
- Propulsion System
- Engine Control System
- Fuel System
- Environmental Control System
- Electrical System
- Navigational System

• Failure to maintain your boat’s systems (listed in the warning above) as designed could violate the laws in your jurisdiction and could expose you and other people to the danger of bodily injury or accidental death.

• Follow the instructions provided in the Sport Boat Owner’s Manual, this Supplement, the engine owner’s manual and all accessory literature.

Special Care For Moored Boats

NOTICE

- To help seal the hull bottom and reduce the possibility of gelcoat blistering on moored boats, apply an epoxy barrier coating.
- The barrier coating should be covered with several coats of anti-fouling paint.
- Many states regulate the chemical content of bottom paints in order to meet environmental standards. Check with your local dealer about recommended bottom paints, and about the laws in effect in your area.

• Whether moored in saltwater or freshwater, your boat will collect marine growth on its hull bottom.
• This will detract from the boat’s beauty, greatly affect its performance and may damage the gelcoat.
• Periodically haul the boat out of the water and scrub the hull bottom with a bristle brush and a solution of soap and water.
Safety Standards

⚠️ DANGER!
FALLING and ROTATING PROPELLER HAZARD!
- NEVER allow anyone to ride on parts of the boat not designed for such use.
- Sitting on seat backs, lounging on the forward deck, bow riding, gunwale riding or occupying the transom platform while underway is especially hazardous and will cause personal injury or death.

⚠️ DANGER!
ROTATING PROPELLER and CARBON MONOXIDE POISONING HAZARD!
- NEVER allow anyone to occupy, or hang from, the back deck or swim platform while the engine(s) are running.
- Teak surfing, dragging, or water skiing within 20 feet of a moving watercraft can be fatal.

⚠️ DANGER!
PERSONAL SAFETY HAZARD!
ALWAYS secure the anchor and other loose objects before getting underway. The anchor and other items that are not properly secured can come loose when the boat is moving and cause personal injury or death.

- Your boat’s mechanical and electrical systems were designed to meet safety standards in effect at the time it was built.
- Some of these standards were mandated by law, all of them were designed to insure your safety, and the safety of other people, vessels and property.

In addition to this Supplement, please read the Sport Boat Owner’s Manual and all accessory instructions for important safety standards and hazard information.
Carbon Monoxide (CO)

**DANGER!**
- Carbon monoxide gas (CO) is colorless, odorless, tasteless, and extremely dangerous.
- All engines, generators, and fuel burning appliances produce CO as exhaust.
- Prolonged exposure to low concentrations or very quick exposure to high concentrations will cause BRAIN DAMAGE or DEATH.
- Teak surfing, dragging, or water skiing within 20 feet of a moving watercraft can be fatal.

**Facts about CO**
- CO poisoning causes a significant number of boating deaths each year.
- Called the "silent killer", CO is an extremely toxic, colorless, odorless and tasteless gas.
- CO can harm or even kill you inside or outside your boat.
- CO can affect you whether you’re underway, moored, or anchored.
- CO symptoms are similar to seasickness or alcohol intoxication.
- CO can make you sick in seconds. In high enough concentrations, even a few breaths can be fatal.
- Breathing CO blocks the ability of your blood to carry oxygen.
- The effects are cumulative, even low levels of exposure can result in injury or death.

**Factors That Increase the Effects of CO Poisoning**
- Age
- Smokers or people exposed to high concentrations of cigarette smoke
- Consumption of alcohol
- Lung disorders
- Heart problems
- Pregnancy
Where and How CO Can Accumulate

Stationary Conditions That Increase CO Accumulations Include:

A. Using engine, generator, or other fuel burning device when boat is moored in a confined space.

B. Mooring too close to another boat that is using its engine, generator, or other fuel burning device.

To correct stationary situations A and/or B:
- Close all windows, portlights and hatches.
- If possible, move your boat away from source of CO.

Running Conditions That Increase CO Accumulations Include:

C. Running boat with trim angle of bow too high.

D. Running boat without through ventilation (station wagon effect).

To correct running situations C and/or D:
- Trim bow down.
- Open windows and canvas.
- When possible, run boat so that prevailing winds help dissipate exhaust.

How to Protect Yourself and Others From CO

- Know where and how CO may accumulate in and around your boat (see above).
- Maintain fresh air circulation throughout the boat at all times.
- Know where your engine and generator exhaust outlets are located and keep everyone away from these areas.
- Never sit on, or hang onto, the back deck or swim platform while the engine(s) are running.
- Never enter the areas under swim platforms where exhaust outlets are located.
- Although CO can be present without the smell of exhaust fumes, if exhaust fumes are detected on the boat, take immediate action to dissipate these fumes.
- Treat symptoms of seasickness as possible CO poisoning. Get the person into fresh air immediately. Seek medical attention—unless you’re sure it’s not CO.
- Install and maintain CO alarms inside your boat. Do not ignore any alarm. Replace alarms as recommended by the alarm manufacturer.
- Follow the checklists provided on the next page.
- Get a Vessel Safety Check.

For information on how to get a free VESSEL SAFETY CHECK, visit www.vesselsafetycheck.org or contact your local U.S. Coast Guard Auxiliary or United States Power Squadrons®.
- U.S. Coast Guard Auxiliary: 1-800-368-5647 or on the Internet at: http://www.cgaux.org
- U.S. Power Squadrons: 1-888-FOR-USPS (1-888-367-8777) or on the Internet at: http://www.usps.org
**CO Checklists**

**Trip Checklist**
- Make sure you know where the exhaust outlets are located on your boat.
- Educate **all** passengers about the symptoms of CO poisoning and where CO may accumulate.
- When docked, or rafted with another boat, be aware of exhaust emissions from the other boat.
- Listen for any change in exhaust sound, which could indicate an exhaust component failure.
- Test the operation of each CO alarm by pressing the test button.

**Monthly Checklist**
- Make sure **all** exhaust clamps are in place and secure.
- Look for exhaust leaking from exhaust system components. Signs include rust and/or black streaking, water leaks, or corroded or cracked fittings.
- Inspect rubber exhaust hoses for burned, cracked, or deteriorated sections. **All** rubber hoses should be pliable and free of kinks.

**Annual Checklist**

**Have a Qualified Marine Technician:**
- Replace exhaust hoses if cracking, charring, or deterioration is found.
- Ensure that your engines and generators are properly tuned, and well maintained.
- Inspect each water pump impeller and the water pump housing. Replace if worn. Make sure cooling systems are in working condition.
- Inspect **all** metallic exhaust components for cracking, rusting, leaking, or loosening. Make sure they check the cylinder head gasket, exhaust manifold, water injection elbow, and the threaded adapter nipple between the manifold and the elbow.
- Clean, inspect, and confirm proper operation of the generator cooling water anti-siphon valve (if equipped).

**CO Monitor**

**NOTICE**

The stereo memory and CO monitor place a small, but constant drain on the battery.

- Do **not** disconnect the CO monitor.
- Read the manufacturer’s instructions for your CO monitor. **If you did not receive the manufacturer’s instructions, call (800) 383-0269 and one will be mailed to you.**

If your boat is **not** equipped with a CO monitor, consider purchasing one from your dealer or marine supply store.
More Information

For more information about how you can prevent carbon monoxide poisoning on recreational boats and other ways to boat more safely, contact:

</tbody>
</table>

### Notes:
- The table above provides the key specifications for the 215 model, including overall length, bridge clearance, beam, draft (drive up and down), and fuel capacity.
- The boat is designed for comfort and functionality, with ample seating and a spacious interior.
- The fuel capacity of 37 gallons suggests that the boat is suitable for extended cruises with sufficient backup fuel.
- The draft specifications indicate that the boat is capable of navigating shallow waters with ease.

### Additional Notes:
- The boat features a sleek design with a modern aesthetic, ensuring both style and practicality.
- The beam measurement of 8' 1" makes it suitable for a variety of water conditions.
- The draft (drive up) of 1' 6" and (drive down) of 2' 11" allows for operation in both deep and shallow waters.

### Conclusion:
- The 215 model is an excellent choice for boat enthusiasts looking for a versatile and comfortable vessel with reliable performance across various water conditions.

Component Locations

12-Volt Accessory Outlet - 192: Located on the port cockpit side panel, next to the entry door.

12-Volt Accessory Outlet - 194 & 195: Located on the port side dash.

12-Volt Accessory Outlet - 210: Located on the starboard aft wall of the cabin, next to the entry door.
12-Volt Accessory Outlet - 215: Located on the port side dash.

Battery: Located on the port side of the engine compartment.

Bilge Pump: Located in the engine compartment bilge.

Carbon Monoxide Monitor - 192 & 210: Located on the starboard aft wall of the cabin, next to the entry door.
Fuel Fill Deck Fitting: Located on the port aft deck.

Fuel Tank: Located under the cockpit floor. Access is through the engine compartment.

Fuse Block: Located under the helm dash.
Livewell Aerator Pump - (194 Only): Located aft in the engine compartment.

Livewell Intake Seacock - (194 Only): Located aft in the engine compartment.

Livewell Aerator Pump Switch - (194 Only): Located at the helm.

Navigation Lights - 192, 195 & 215: A single red and green light is located on the bow, and a removable white all-round light is located on the stern.
Navigation Lights - 194:
A removable red and green light is located on the bow, and a removable white all-round light is located on the stern.

Navigation Lights - 210:
Separate red and green lights are located on the bow, and a removable white all-round light is located on the stern.

Power Trim and Tilt Reservoir:
Located on the starboard aft wall of the engine compartment.

Trolling Motor Push-To-Reset Circuit Breaker - (194 Only):
Located on the starboard aft cockpit wall.
Chapter 4: Propulsion & Related Systems

Engine
Read the engine operation and maintenance manuals before starting or doing any maintenance on the engine.

Special Starting Instructions for Carbureted Engines (If Equipped)
Some carbureted engines can be difficult to start when they are cold. In addition to following all instructions and heeding all warnings in the engine manual, try the following:
1. Pump the throttle lever from the 1/4 throttle position to the full throttle position 3 or 4 times.
2. Return the throttle lever to the 1/4 throttle position.
3. Continue the starting procedure as described in the engine manual.

Bilge Blower System

WARNING!
FIRE/EXPLOSION HAZARD

- Use of the bilge blower system is NOT A GUARANTEE that explosive fumes have been removed.
- BEFORE starting the engine ALWAYS use the "sniff test" to check the engine and bilge areas for fuel vapors.
- If you smell fuel, do NOT start the engine and do NOT turn On any electrical devices.
- If you smell fuel and the engine is already running, shut Off the engine and turn Off all electrical devices. Investigate immediately.
- Do NOT obstruct or modify the bilge blower system.

BILGE BLOWER SYSTEM FOR 195, 192 & 194

BILGE BLOWER SYSTEM FOR 215 & 210

BLOWER

BLOWER HOSES
• The bilge blower removes explosive fumes from the engine and bilge areas.
• Fresh air is drawn into the engine and bilge areas through the vents.

To make sure the engine and bilge areas are properly ventilated:
• Use the "sniff test" to check the engine and bilge areas for fuel vapors before starting the engine.
• Always run the bilge blower for at least four minutes before starting the engine.
• Continue to run the blower until your boat has reached cruising speed.
• Always run the blower when running the boat below cruising speed.

Fuel System

<table>
<thead>
<tr>
<th>WARNING!</th>
<th>FIRE, EXPLOSION AND OPEN FLAME HAZARD!</th>
</tr>
</thead>
<tbody>
<tr>
<td>• It is very important that the fuel system be inspected thoroughly the first time it is filled and at each subsequent filling.</td>
<td></td>

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carefully read the fuel section of both the Sport Boat Owner’s Manual and the engine operation manual, paying special attention to the subject of fuel recommendations.</td>
</tr>
</tbody>
</table>

**Fuel Fill & Vent**
• The fuel fill fitting is marked "Gas".
• If you have problems filling the fuel tank, see if the fuel fill hose or fuel tank vent hose is kinked or collapsed.
• If there are no visible signs of a problem, contact your local dealer.
**Fuel Filters**

- The fuel pickup tube, located inside the fuel tank, is equipped with a fine mesh screen filter.
- In addition, when supplied by the engine manufacturer, a fuel filter is installed on the engine.
- Periodically replace the fuel filters to make sure they remain clean and free of debris.
- Talk to your selling dealer or local marina about fuel additives that help prevent fungus or other buildup in your fuel tank.

**Anti-siphon Valve**

**NOTICE**

- If an engine running problem is diagnosed as fuel starvation, check the anti-siphon valve.
- If the valve is stuck or clogged, change or replace it while the engine is shut down.
- *NEVER* run the engine with the anti-siphon valve removed, except in an emergency.

- The anti-siphon valve is a vital fuel system part.
- If the fuel line ruptures, this valve will prevent the fuel from siphoning from the tank.
- The valve is located on the fuel tank, where the fuel feed line attaches to the tank.
- The valve is spring loaded and is opened by fuel pump vacuum.
Quick Oil Drain System

The quick oil drain hose was attached to the engine oil pan at the factory. However, some minor assembly is still needed before you can use this system.

**How to install the quick oil drain system:**

1. Unscrew the factory installed garboard drain plug from the garboard drain (A). Keep the factory garboard drain plug on the boat as a spare.
2. Un-clip the quick oil drain assembly from the wire loop (B) on the engine.
3. Un-clip the draw cord section (C) from the draw cord section (D).
4. Thread the draw cord section (D), the oil drain plug (E), and the oil drain hose (F) through the garboard drain (A).
5. Adjust the hose stop clamp (G) so that no more than 12 inches of hose, including the oil drain plug, can extend out of the garboard drain (A).
6. Re-clip the draw cord section (C) to the draw cord section (D).
7. Push the oil drain hose, oil drain plug, and both sections of the draw cords through the garboard drain and into the bilge area.
8. Screw the oil drain garboard drain plug (H) into the garboard drain (A) and tighten firmly.

**To drain the engine oil:**

1. Remove the boat from the water.
2. Unscrew the garboard drain plug.
3. Pull the draw cord until the oil drain plug and the oil drain hose slide out of the garboard drain.
4. Place the end of the oil drain hose into a suitable container.
5. Unscrew the oil drain plug and drain the engine oil.
6. Replace the oil drain plug.
7. Push the drain hose back into the bilge.
8. Replace the garboard drain plug and tighten firmly.

*Always dispose of waste oil in accordance with local regulations.*
Chapter 5: Controls & Gauges

Steering

- This boat features a power assisted* rack-and-pinion steering system.
- For information about the 'power assist fluid reservoir', refer to the engine operation and maintenance manual.
- Boat steering is not self-centering.
- Refer to the engine manual for more steering system details.
*3.0L engines feature mechanical rack-and-pinion steering.

Shift/Throttle Controls

[WARNING!]

LOSS OF CONTROL HAZARD!
Improper maintenance of shift/throttle hardware may cause a sudden loss of control!

- Read all of the information about the shift/throttle controls in the Sport Boat Owner’s Manual.
- Also, read the shift/throttle controls manual and the engine manual.

Power Trim and Tilt

- The stern drive on your boat is equipped with power trim and tilt.
- Trim and tilt instructions are provided in the engine operation manual and the shifter/throttle manual.
Gauges

Cleaning Gauges

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PRODUCT or PROPERTY DAMAGE HAZARD!</strong></td>
</tr>
<tr>
<td>• Use only mild soap and water to clean the gauge lenses and bezels.</td>
</tr>
<tr>
<td>• Use of other cleaners, including common window cleaning solutions, may cause the lenses to crack.</td>
</tr>
<tr>
<td>• Lenses cracked in this manner will <strong>NOT</strong> be covered by our warranty.</td>
</tr>
</tbody>
</table>

Gauge Fogging

• Moisture may occasionally find its way into the gauges causing lens fogging.
• Turning **On** the gauge lights will help dry the lenses.
• Fogging will **not** harm the gauges.

Radio Transmission Interference

VHF or other radio transmissions may cause brief erratic readings on the tachometer. This will **not** damage the tachometer gauge or affect its accuracy when not transmitting.

Fuel Gauge

It is normal for the pointer on your fuel gauge to bounce as fuel sloshes back and forth in the fuel tank.
Chapter 6: Plumbing

Bilge Pump

- Your boat is equipped with a bilge pump for pumping water out of the bilge.
- The bilge pump is controlled by a switch at the helm.

**Bilge Pump Testing**

- The bilge pump is vital to the safety of your boat.
- Test the bilge pump often to make sure it is working properly.

**To test each bilge pump:**

- Turn *On* the bilge pump switch at the helm.
- If there is water in the bilge and a pump motor is running, but *not* pumping, inspect the discharge hose for a kink or collapsed area.

If the discharge hose looks okay, check the bilge pump housing for clogging debris.

**Checking for clogging debris:**

1. Remove the pump motor from the housing:
   a. Lift the tab while rotating the fins counter-clockwise.
   b. Lift out the pump motor.
   c. Clear the housing of debris.
2. Reinstall the pump motor:
   a. Make sure the “O” ring is properly seated.
   b. Coat the “O” ring with a light film of vegetable or mineral oil.
   c. Align the cams on either side of the pump motor with the slots on the housing.
   d. Press the pump motor into the housing while twisting clockwise.
3. Check the reinstallation by trying to twist the fins counter-clockwise *without* lifting the tab; the pump motor should stay in place.
Drain Systems

Deck Drains
• Water on the deck is drained overboard through the deck drains.
• Keep the deck drains free of debris.

Portable Toilet

NOTICE
Check with local authorities for regulations regarding the legal use of marine head systems.

Read the manufacturer’s operating instructions before using the portable toilet.

Seawater System (194 Only)

Seacock

CAUTION
SYSTEM DAMAGE HAZARD!
• Before using the seawater intake system, make sure that the system’s seacock is in the Open position before the system is started and keep the seacock Open until the system is shut Off.
• Close the seacock whenever the system will not be used for long periods of time.

• A seacock is a thru-hull valve, that may be opened to let in water.
• The seacock on the 194 is part of the livewell system.
• Before using the livewell, make sure that the seacock is Open and remains Open until the livewell is shut Off.
Livewell System (194 Only)

**WARNING!**

**FLOODING & SWAMPING HAZARD!**
- While the livewell system is running, NEVER leave the boat unattended for any length of time.
- Any leak or break in the system could allow large amounts of water to pump into the bilge, swamping the batteries and engine, or even sinking the boat.
- Close the intake seacock whenever the livewell system is not in use.

**CAUTION**

**SYSTEM DAMAGE HAZARD!**
Before using the livewell system, make sure that the intake seacock is in the Open position and keep the intake seacock Open until the system is shut Off.

**Filling & Using the Livewell**

1. Insert the end of the drain stand-pipe into the drain fitting at the bottom of the tank.
2. Open the seawater intake seacock.
3. On the switch panel, turn On the livewell pump. See Locations section of this Supplement for the location of the livewell pump switch.

The tank should now be filling with water. If water is not pumping into the tank, possible causes are:
- A collapsed hose or clogging debris in the system.
- The seawater intake seacock is Closed.
- The livewell fuse is blown.

**To Drain the Livewell**

Drain the livewell by removing the stand-pipe.
Chapter 7: Deck Equipment

Cleats and Tow Eyes

⚠️ WARNING! ⚠️

PERSONAL INJURY and /or PRODUCT or PROPERTY DAMAGE HAZARD!

NEVER lift the boat using the bow and stern eyes or the cleats.

Read the section on towing in the Sport Boat Owner’s Manual before:
• Towing anything behind the boat.
• Being towed by another vessel.

Pre-rigging For Bow Mount Trolling Motor (194 Only)
• The 194 is pre-wired for a bow mount trolling motor, including a push-to-reset circuit breaker (For the location of this circuit breaker, see the Component Locations section of Chapter 3 in this Supplement).
• The forward deck has a reinforced area to support a trolling motor bracket.
• The trolling motor system can be used safely with either a 12-volt or a 24-volt motor.
• Contact your selling dealer for a list of compatible equipment and installation instructions.

Ski Tow Ring

⚠️ WARNING! ⚠️

PERSONAL INJURY and /or PRODUCT or PROPERTY DAMAGE HAZARD!

Failure to follow these guidelines can result in injury or death:
• Only tow water skis, wakeboards, or recreational towables.
• Do NOT tow parasails, kites, or other boats.
• Do NOT tow more than two persons at one time.
• Use caution with skier in tow as tow rope may snap back into cockpit when released.

• Attach tow rope as shown in the photo.
• Read the pamphlet, "Waterski Safety Guidelines."
Canvas (If Equipped)

**CAUTION**

PRODUCT or PROPERTY DAMAGE HAZARD!
Take down and securely stow ALL canvas before transporting your boat by road.

192 & 195 Convertible Top (If Equipped)

1. Slide the windshield hinges of the main bow (A) over the pre-drilled holes (B) in the side windshield frames and insert the securing pins.
2. Unfold the canvas top and snap the front edge of the top to the top of the windshield frame (C).
3. Insert the end eyes of the aft braces (D) into the aft deck hinges (E) and insert the securing pins.
4. Align the secondary bow (F) with the center seam (G) of the canvas by loosening or tightening the top straps (H).
   - The jaw slides (I) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
   - If other canvas (i.e. side curtains or slant back cover) is installed, the canvas top may need adjustment to align the snaps on the canvas with the snaps on the boat.

195 Bimini Top (If Equipped)

1. Slide the windshield hinges of the main bow (A) over the pre-drilled holes (B) in the side windshield frames and insert the securing pins.
2. Unfold the canvas and insert the end eyes of the forward braces (C) into the forward deck hinges (D) and insert the securing pins.
3. Insert the end eyes of the aft braces (E) into the aft deck hinges (F) and insert the securing pins.
   - The jaw slides (G) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
**194 Convertible Top (If Equipped)**

1. Insert the end eyes of the main bow (A) into the forward deck hinges (B) and insert the securing pins.
2. Unfold the canvas top and snap the front edge of the top to the top of the windshield frame (C).
3. Insert the end eyes of the aft braces (D) into the aft deck hinges (E) and insert the securing pins.
4. Align the secondary bow (F) with the center seam (G) of the canvas by loosening or tightening the top straps (H).
   - The jaw slides (I) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
   - If other canvas (i.e. side curtains or slant back cover) is installed, the canvas top may need adjustment to align the snaps on the canvas with the snaps on the boat.

**194 Bimini Top (IF Equipped)**

1. Insert the end eyes of the main bow (A) into the middle deck hinges (B) and insert the securing pins.
2. Unfold the canvas and insert the end eyes of the forward braces (C) into the forward deck hinges (D) and insert the securing pins.
3. Insert the end eyes of the aft braces (E) into the aft deck hinges (F) and insert the securing pins.
   - The jaw slides (G) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
210 & 215 Convertible Top

1. Slide the windshield hinges of the main bow (A) over the pre-drilled holes (B) in the side windshield frames and insert the securing pins.
2. Unfold the canvas top and snap the front edge of the top to the windshield frame (C).
3. Insert the end eyes of the aft braces (D) into the deck hinges (E) and insert the securing pins.
4. Align the secondary bow (F) with the center seam (G) of the canvas by loosening or tightening the top straps (H).
   - The jaw slides (I) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
   - If other canvas (i.e., side curtains or slant back cover) is installed, the canvas top may need adjustment to align the snaps on the canvas with the snaps on the boat.

215 Bimini Top (If Equipped)

1. Slide the windshield hinges of the main bow (A) over the aft pre-drilled holes (B) in the side windshield frames and insert the securing pins.
2. Unfold the canvas and slide the windshield hinges of the forward braces (C) over the forward pre-drilled holes (D) in the side windshield frames and insert the securing pins.
3. Insert the end eyes of the aft braces (E) into the aft deck hinges (F) and insert the securing pins.
   - The jaw slides (G) should not need to be adjusted.
   - If you decide to adjust the jaw slide positions, obtain the correct measurements from your selling dealer.
Canvas Care (see also, ‘Clear Vinyl Care’ on next page)

- After each use, especially in saltwater, rinse the canvas with cold freshwater.
- Before stowing, let the canvas air dry completely.
- The canvas can be rolled or folded for stowage.

Cleaning Canvas

⚠️ CAUTION

Never use detergents when washing the canvas. Detergents can destroy the water repellency, and mildew/UV resistant finish of your canvas.

Regularly clean the canvas to prevent dirt, pollen, and etc. from embedding in the fabric. Generally, it is easiest to wash the canvas while it is installed on the boat.
- Use a soft-bristled brush to remove all dust and loose dirt.
1. Hose down the canvas with freshwater.
2. Gently wash the canvas with a solution of lukewarm water (no more than 100 F) and non-detergent soap, such as Lux or Ivory Flakes.
3. Rinse thoroughly to remove the soap.
4. Before stowing, let the canvas dry completely.

Stubborn Stains

⚠️ CAUTION

- Soaking in bleach solutions may remove the waterproof finish of the fabric and may also decrease the life of the polyester thread used in the canvas.
- If necessary, a water repellent treatment should be re-applied to your canvas. Ask your dealer about the treatments available for your boat’s canvas.

Some stubborn stains may resist normal washing and you can try the following methods. However, these methods may remove the waterproof finish of the fabric and may also decrease the life of the polyester thread used in the canvas. Reapply a water repellent treatment as necessary.

Method 1
1. Add 1/8 cup (2 oz.) of non-chlorine bleach to one gallon of water and mix thoroughly.
2. Thoroughly wet the canvas and then gently scrub the stained area with the weak bleach solution.
3. Rinse with cold water to remove all of the solution.

Method 2
1. Add 1/2 cup (4 oz.) of non-chlorine bleach and 1/2 cup (4 oz.) Ivory Flakes to one gallon of water and mix thoroughly.
2. Soak the canvas in this solution for about 20 minutes.
3. Rinse with cold water to remove all of the solution.
Clear Vinyl Care

**CAUTION**

- NEVER store the clear vinyl pieces wet, as this will cause a milky film to develop.
- NEVER fold or crease the clear vinyl pieces as cracking will occur.
- Clear vinyl is **not** intended for use when the boat is in storage or being moored.
- Clear vinyl does not hold up well against ultraviolet rays.
- Under direct sunlight conditions, do **NOT** let the clear vinyl touch the framework. The framework radiates heat and can burn the clear vinyl.

- After each use, especially in saltwater, rinse the clear vinyl with cold freshwater.
- **Before** stowing, the clear vinyl must be completely dry. Air drying is best, but you can also carefully dry the vinyl with a chamois or soft cotton cloth.
- The clear vinyl can be rolled or laid out flat for stowage.
- **Never** fold or crease the clear vinyl parts as cracking will occur.

**Cleaning Clear Vinyl**

Regularly clean the clear vinyl to prevent dirt, pollen, and etc. from marring the surface. Generally, it is easiest to clean the clear vinyl while it is installed on the boat.

1. Hose down the clear vinyl with freshwater.
2. Using a soft cotton cloth (paper towels are abrasive and should never be used on clear vinyl), gently wash the clear vinyl with soap and water.
3. Rinse thoroughly to remove the soap.
4. **Before** stowing, the clear vinyl must be completely dry. Air drying is best, but you can also carefully dry the vinyl with a chamois or soft cotton cloth.

- Ask your dealer about products available to keep the clear vinyl polished and looking new.
Chapter 8: Entertainment System

Audio System

NOTICE
AM radio reception may be impaired anytime the engine is running.

Read the audio system instructions *before* using the system.
Chapter 9: Convertible Seats, Beds, & Tables

Sleeper Seats
- The sleeper seats can be adjusted fore and aft in the upright, operating position.
- The seat bottoms adjust into backrests when the seats are in the lounge position.

Operating Positions

To slide the seat forward:
1. Lift the forward seat at point (A).
2. Push down on the forward seat at point (B) and pull the seat forward.
3. Lock the forward seat into the desired position by pushing down at point (A).
4. Lift the aft seat at point (C).
5. Push down on the aft seat at point (D) and push the seat forward until the aft seat back is flush against the forward seat back.
6. Lock the aft seat into position by pushing down at point (C).
To slide the seat aft, repeat the steps above, but start with the aft seat.

Lounge positions

To adjust into the flat lounge position:
1. Lift the forward seat at point (A).
2. Push down on the forward seat at point (B) and pull the seat forward until the seat back and bottom are flat.
3. Lift the aft seat at point (C).
4. Push down on the aft seat at point (D) and pull the seat aft until the seat back and bottom are flat.

To adjust into the chaise lounge position:
1. Lift up on the forward or aft seat bottom at point (A or C) and push the seat bottom down into the locked position.
2. To lower the seat bottom, lift the seat at point (A or C). Drop the seat bottom flat while holding the seat down at point (E).

To return the seats to the operating position:
1. Lift the seat backs at point (F) and push down on the back edge of the seat bottom (B) and then seat bottom (D).
2. Push the seat bottoms towards the center of the seat until the seat backs are flush against each other and locked into place.
Jump Seat To Sunlounge Conversion

1. Remove the jump seats (A) by sliding them forward.

2. Slide the lounge support inserts (B) into the lounge support slots (C).

3. Press down firmly on the inboard side of each jump seat (A) until they rest firmly on the motorbox ledges.

PERSONAL SAFETY HAZARD!

NEVER allow anyone to occupy the aft sunlounge cushions when the engine is running.
Removable Fishing Seat (194 Only)

**DANGER!**

**FALLING and ROTATING PROPELLER HAZARD!**

- *NEVER* allow anyone to ride on parts of the boat *not* designed for such use.
- Sitting on seat backs, lounging on the forward deck, bow riding, gunwale riding or occupying the transom platform while underway is especially hazardous and *will* cause personal injury or death.

Remove and stow the fishing seat in a safe and secure area *before* getting underway or trailering your boat.
Chapter 10: Lights

Care and Maintenance

All of the lights installed on your boat are of top quality, but you should be aware that failure may periodically occur for a variety of reasons:

1. There may be a blown fuse - *replace the fuse*.
2. The bulb may be burned out - *carry spare bulbs for replacement*.
3. A wire may be damaged or may have come loose - *repair as required*.
4. The bulb base may be corroded - *clean the base and coat it with non-conductive electrical lubricant*.

Interior & Exterior Lights

<table>
<thead>
<tr>
<th>CAUTION!</th>
</tr>
</thead>
</table>
| • Be conservative in the use of battery power.  
• Prolonged use of cabin interior lights (overnight) will result in a drained battery. |

The lights are powered by the boat’s 12-volt DC system.

Navigation Lights

<table>
<thead>
<tr>
<th>CAUTION!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Avoid the storage of gear where it would block navigation lights from view.</td>
</tr>
</tbody>
</table>

Read the navigation light section in the *Sport Boat Owner’s Manual*. 
Chapter 11: Electrical System

⚠️ DANGER!

**EXTREME FIRE, SHOCK & EXPLOSION HAZARD!**

- To minimize the risks of fire and explosion, *NEVER* install knife switches or other arcing devices in the fuel compartments.
- *NEVER* substitute automotive parts for marine parts. Electrical, ignition and fuel system parts were designed and manufactured to comply with rules and regulations that minimize risks of fire and explosion.
- Do *NOT* modify the electrical systems or relevant drawings.
- Have qualified personnel install batteries and/or perform electrical system maintenance.

⚠️ WARNING!

**FIRE & EXPLOSION HAZARD!**

- Fuel fumes are heavier than air and will collect in the bilge areas where they can be accidently ignited.
- Visually and by smell (sniff test), check the engine and fuel compartments for fumes or accumulation of fuel.
- *ALWAYS* run the bilge blower(s) for at least four minutes prior to engine starting, electrical system maintenance or activation of electrical devices.
- *NEVER* expose the batteries to open flame or sparks, and *NEVER* smoke anywhere near the batteries.

⚠️ CAUTION

**SHOCK & ELECTRICAL SYSTEM DAMAGE HAZARD!**

When the engine is running, *NEVER* disconnect the battery cables. Doing so could cause damage to your boat’s engine and/or electrical system.

NOTICE

Electrical connections are prone to corrosion. To reduce corrosion caused electrical problems, keep all electrical connections clean and apply a spray-on protectant that is designed to protect connections from corrosion.
12-Volt DC System

Battery
The battery supplies electricity for lights, 12-Volt accessories, and engine and starting.
The Electrical section of Chapter 8, in the Sport Boat Owner’s Manual, provides battery care and maintenance instructions.

Fuses and Circuit Breakers
- Fuses for the engine and main accessory power are on the fuse block (see the Locations section of this Supplement for the location of the fuse block).
- Some equipment may have secondary fuse protection at the unit, or at the battery.

12-Volt Accessory Outlet

CAUTION
Do NOT use the 12-volt accessory outlet with a cigarette or cigar lighter. High temperatures may melt the outlet.

- The 12-volt accessory outlet can be used with any 12-volt device which draws 10-amps or less.
- The 12-volt accessory outlet is protected by a 10-amp fuse on the fuse block.

Alternator
The alternator will keep the battery properly charged when the engine is running at, or above, cruising speeds.
